

Dear _____,

We are writing to express our commitment to ending homelessness in New Jersey and to request your support. A \$217 million increase to \$2.6 billion in FY 18 funding for the McKinney-Vento Homeless Assistance Grants program would house approximately 40,000 more people than last year nationally and allow New Jersey to make significant progress toward ending homelessness. We urge you to fund McKinney-Vento at least at \$2.6 billion in FY 2018.

NJCounts 2017, the statewide point in time count of the homeless, found 8,532 homeless men, women and children, in 6,340 households, across the state of New Jersey. This number decreased by 409 persons (4.6%) from 2016. NJCounts 2017 counted individuals who were homeless on the night of January 24, 2017. This number includes some of the most vulnerable members of our community - veterans, families with children, chronically homeless people with disabilities, and unaccompanied youth.

The increasing gap between incomes and rents affects many members of our community, and continues to drive increases in the number of people becoming homeless. In the 11th Congressional District, 71% of severely burdened households, 37,647 households, with incomes at or below 30% of area median income (AMI) are severely rent burdened. There are only 34 affordable and available rental units available for every 100 households with incomes at or below 30% of AMI. This translates to a need for 35,168 affordable and available rental units in the 11th district.

New Jersey employs evidence-based approaches that move people quickly into permanent housing. These approaches are consistently supported and incentivized by Congress and the U.S. Department of Housing and Urban Development (HUD.)

The progress in ending homelessness in New Jersey results from a broad community effort. This effort includes a systemic approach from our Continuum of Care (CoC) leadership, support from local and state government, buy-in from private and public stakeholders, and generosity from local and state-level philanthropy. Federal funding provided by McKinney-Vento and other targeted homeless assistance programs is central to this effort. This funding is essential in our fight against homelessness.

We understand the solution and have the tools to effectively solve. Allowing people to remain unsheltered and unsafe on the streets, or to cycle through costly crisis systems, is immoral and expensive. We are grateful for the federal funding provided to allow New Jersey to respond to the crisis of homelessness. We are particularly appreciative of the \$133 million increase to McKinney-Vento in the FY 17 spending bill. However, our work is not done, and we need your increased investment to continue our progress. Current federal funding levels, even when strategically leveraged locally, will not be sufficient for us to meet the rising numbers of people experiencing in our community.

Thank you for your continued leadership and for championing the cause of ending homelessness.

Sincerely,
